As of the end of this quarter, the Estate held 46 policies on 39 individuals with an aggregate face value of \$114.1 million. Through September of 2017, the Estate has had 8 maturities; two of which were on policies insuring the same individual. ***There were no maturities in this quarter.*** The portfolio's actual mortality performance through September 30, 2017 is shown below:

Insurance Portfolio Profile

	<u># of Policies</u>	<u># of Lives</u>	<u>Face Value</u>
As of May 5, 2010	54	46	\$141,585,000
Maturities (prior periods)	8	7	27,500,000
Maturities (this Quarter)	0	0	0
As of September 30, 2017	46	39	\$114,085,000

The Receiver last updated the valuation of the policies as of December 31, 2016. The estimated fair market value is based on the net present value of the future stream of cash flows (i.e. the payment of projected premiums, collections of death benefits, etc.) discounted to the valuation date. As of September 30, 2017, the remaining policies' estimated fair market value was \$18,954,134 million.

Total approved investor claims against the Estate are \$80.4 million; of which \$11 million have been paid and \$69.4 million remain outstanding. The Plan of Distribution anticipates net distributable cash flow from the portfolio of between \$0.80 to \$1.20 per dollar invested, with an expected distribution of \$1.00 per dollar invested over the next 20 or so years. Through September 30, 2017, investors have recovered about 13.7% of their investment.

The most readily apparent proxy for the claims' current value is their estimated participation in an immediate liquidation of the Estate's assets. The table below reflects the potential recovery from liquidation per dollar of claim: (i) as to the investors' total claim, taking into account the \$11 million in prior distributions; and (ii) as to remaining assets and remaining claim balances.

Liquidation Analysis (as of September 30, 2017)

	<u>Total Investor Claims</u>	<u>Outstanding Investor Claims</u>
Assets		
Policies	\$18,954,134	18,954,134
Claims Pending Collection	-	-
Cash On Hand	5,610,633	5,610,632.77
Prior Distributions	<u>10,985,790</u>	-
Est Liquidation Value	35,550,556.77	24,564,767
Claims	80,361,992	69,470,337
Liquidation Recovery per \$ Claimed	\$0.44	\$0.35

The Estate anticipates paying over \$68 million in premiums. With only \$5.6 million on hand, the Estate must use the death benefits from earlier maturities to pay future premiums. This means that the Estate's receipt of cash does not automatically translate into a distribution to the claimants. The Estate can only make cash distributions when its premium reserves are sufficient to ensure that the Estate retains its ability to make premium payments even if the portfolio does not perform as expected.
